

**Instructions:**

1. Print both sheets of the model board in color, if possible.
2. Cut or fold along the dashed line.
3. Line up the arrow pointing to the liver and the pancreas on both pages so they overlap.
4. Tape the two pages together.
5. Make a balance by cutting out a 1 inch x 7 inch piece of heavy paper (i.e. card stock). Make a point at one end.
6. Insert a metal brad, pin, or paper clip through middle of the balance at the X.
