*Genes, the Environment, and Me* (GEM) supports teaching and learning about fundamental genetic concepts, complex diseases like type 2 diabetes that are influenced by gene-environment interactions, and how basic biomedical research is translated into clinical and public health practice.

We invite high school science teachers to join us this summer in developing lessons, collaborating with colleagues, and hearing interesting guest speakers. Preference will be given to teachers from the Yakima Valley and neighboring communities in central Washington, and we encourage two or more teachers from a single school to attend.

Collectively, we will revise hands-on, experimentally-based, and hypothesis-driven lessons for high school students that focus on gene-environment interactions using model organisms (e.g. yeast and the nematode *C. elegans*). We will also develop a module that engages students in understanding the scientific basis and the societal and public health issues related to type 2 diabetes.

EXTENDED APPLICATION DEADLINE IS June 12, 2012 or until workshop is full.

WHEN: June 18-22, 2012
8:30am - 4:30pm

WHERE: Heritage University, Toppenish, Washington

STIPEND, CREDITS, AND CLOCK HOURS
- $1000 honorarium on completion of five days of workshop
- Lunch and snacks provided
- UW graduate credits or clock hours at the teacher’s expense

To apply for the workshop, please complete the registration form on the next page and submit it by email to Maureen Munn at mmunn@uw.edu or FAX to 206-685-7301 (attention: Maureen Munn).

For more information about the workshop, please contact Maureen Munn at mmunn@uw.edu or 206-616-4538.
Registration Form: *Genes, the Environment, and Me* 2012 Summer Workshop

Please complete the registration form and submit it by email to Maureen Munn at mmunn@uw.edu or FAX to 206-685-7301 (attention: Maureen Munn).
